## Math M118 ~ Mentoring Schedule

Effective Date 08/26/2009

### *Mathematics Assistance Center*

---

The Mathematics Assistance Center (MAC), a joint venture of the Department of Mathematical Sciences and University College, offers free mentoring to everyone registered in your course.

Mentoring is a facilitated study group that goes over class specific examples as well as clearing up questions that students might have from class or lecture. The sessions are led by trained mentors who did well in the course and are here to help you succeed in your class. Mentors help prepare for their sessions by sitting in on lecture twice a week and preparing suitable examples pertaining to problems where students commonly make mistakes.
