

**First Illinois-Indiana Symplectic Geometry Conference
Indiana University Purdue University Indianapolis**

March 15–16, 2008.

All talks are in the Science Auditorium, room LD-010, in the basement of the School of
Science (LD) building.
(402 N. Blackford St., corner with Vermont St.)

Saturday, March 15

9:30 Registration, continental breakfast.

10:30 **Dusa McDuff** (Stony Brook University)
Some new 6-dimensional Hamiltonian S^1 manifolds.

11:30 Coffee and refreshments.

12:00 **Yi Ni** (Columbia University)
Heegaard Floer homology and fibred three-manifolds.

1:00 Lunch.

2:30 **John Etnyre** (Georgia Institute of Technology)
Duality exact sequences in contact homology.

3:30 Coffee and refreshments.

4:00 **Ko Honda** (University of Southern California)
Contact structures, Heegaard Floer homology and triangulated categories.

Sunday, March 16

8:30 Continental breakfast.

9:00 **Octav Cornea** (University of Montreal)
Narrow and wide Lagrangian submanifolds.

10:00 Coffee and refreshments.

10:30 **Denis Auroux** (MIT)
Special Lagrangian tori and mirror symmetry.
